Licence conditions

Your licence is subject to conditions set out in the *Radiocommunications Act 1992*. Your licence may also be subject to such other licence conditions as determined by the ACMA (in licence condition determinations) from time to time, and is also subject to special conditions as detailed on this licence.

The conditions that are imposed on a licence vary according to the type of licence issued, the service being operated and the section of the *Radiocommunications Act 1992* under which the licence has been issued. For further information about the conditions that apply to your licence, please contact the ACMA (see contact details below).

Rights of appeal

A decision by the ACMA to impose further conditions or revoke or vary the conditions of your licence may be reviewable. If you are affected by, and dissatisfied with, such a decision you may apply to the ACMA to have the ACMA reconsider the decision under section 288 of the *Radiocommunications Act 1992*.

An application for reconsideration must state the reasons for the request, and should be sent to the Customer Service Centre, Australian Communications and Media Authority, PO Box 78, Belconnen, ACT, 2616. Applications for review of decisions can be made using the R051 - Application for review of Decision form, available on the ACMA website.

Important

An application for the ACMA to reconsider a decision to impose or vary licence conditions must be made to the ACMA within 28 days of the day on which you are informed of the decision. An application for reconsideration made after that time may not be accepted.

Special Conditions applying to Station 0 Site 1

No interference shall be caused to any Radiocommunication station or service and no protection from interference by such stations or services shall be afforded.

The emissions of transmitters must comply with the undesirable emission limits specified in the Federal Communications Commission (FCC) Rule 15.407 (b) (4) and also with the transmit spectrum mask requirements of section 17.3.9.2 of the Institute of Electrical and Electronics Engineers (IEEE) Standard 802.11a - 1999, except where the transmitter complies with the Radiocommunications (Low Interference Potential Devices) Class Licence or Radiocommunications (Spread Spectrum Devices) Class Licence.

The 3 dB antenna beamwidth of transmitters must not exceed +/- 5.5 degrees in the horizontal plane, except where the transmitter complies with the Radiocommunications (Low Interference Potential Devices) Class Licence or Radiocommunications (Spread Spectrum Devices) Class Licence.

Special Conditions applying to Station 0 Site 2

The 3 dB antenna beamwidth of transmitters must not exceed +/- 5.5 degrees in the horizontal plane, except where the transmitter complies with the Radiocommunications (Low Interference Potential Devices) Class Licence or Radiocommunications (Spread Spectrum Devices) Class Licence.
