Licence conditions

Your licence is subject to conditions set out in the *Radiocommunications Act 1992*. Your licence may also be subject to such other licence conditions as determined by the ACMA (in licence condition determinations) from time to time, and is also subject to special conditions as detailed on this licence.

The conditions that are imposed on a licence vary according to the type of licence issued, the service being operated and the section of the *Radiocommunications Act 1992* under which the licence has been issued. For further information about the conditions that apply to your licence, please contact the ACMA (see contact details below).

Rights of appeal

A decision by the ACMA to impose further conditions or revoke or vary the conditions of your licence may be reviewable. If you are affected by, and dissatisfied with, such a decision you may apply to the ACMA to have the ACMA reconsider the decision under section 288 of the *Radiocommunications Act 1992*.

An application for reconsideration must state the reasons for the request, and should be sent to the address listed below. Applications for review of decisions can be made using the R051 - Application for review of Decision form, available on the ACMA website.

Important

An application for the ACMA to reconsider a decision to impose or vary licence conditions must be made to the ACMA within 28 days of the day on which you are informed of the decision. An application for reconsideration made after that time may not be accepted.

Special Conditions applying to Station 1

1. The direction of minimum CMF is to lie within 1 degree of 49, 121, 198 and 332 degrees true north.
2. The minimum CMF is to lie in the range 120V to 150V.
3. The coverage area of this transmission is described as that area within a radius of 80 kilometres measured from a point with the following AMG co-ordinates: Zone: 55; Easting; 297980; Northing: 5804100. This point is not the same as the nominal transmitter site.
4. This transmission is permitted within the defined coverage area. The transmitter may be established at an alternative site to the nominal site only within this area. A change in site from the nominal site is to be in accordance with the Change of Transmitter Site Procedure of the ABA's Technical Planning Guidelines, and is not to result in an increase in field strength in the direction of minimum CMF, in excess of that which would have been provided at the specified power and pattern from the nominal site.
